

# Daniel Chen

## Senior Data Engineer

c-se-usa-02@example.com · USA · candidate id C-SE-USA-02

### EXPERIENCE

#### Senior Data Engineer · Synth Corp 2

2020-01 – 2024-06

- Designed and shipped a Durable Functions pipeline ingesting 30k claims/day with sub-second p95 latency.
- Led migration from a snowflake-of-bash to a typed Python data layer; cut on-call pages by 70%.
- Owned the cost-attribution model that surfaced \$1.2M of annual savings on idle compute.

### EDUCATION

BSc CS · Synthetic University · 2016

### SKILLS

|            |       |         |     |
|------------|-------|---------|-----|
| python     | spark | airflow | dbt |
| kubernetes |       |         |     |

### RIGHT TO WORK

Jurisdiction: **USA** · Evidence: **h1b**
